

## Canada's Population of Raptors

Raptors are known as prey birds because they hunt and feed on other animals. Raptors are known for their sharp vision that allows them to spot prey from their flight and powerful claws and beaks.

Graph the data given below and analyze the graph. Label the graph.

Year	% Changes Raptors
1970	0
1975	6
1980	12
1985	21
1990	31
1995	34
2000	52
2005	65
2010	70

Does the graph represent a positive or negative growth (slope)?

---

Is the population of raptors increasing, decreasing or constant between 1970 and 2010?

---

Does the graph represent a linear relationship? If yes, calculate the slope.
