93) Simplify algebraic expression

$(3x) \div 3 + (10 - 9 \div 3) =$

a) Solve for $x = 0$ _____

b) Solve for $x = 2$ _____

c) Solve for $x = 1$ _____

94) Simplify algebraic expression

$((70x \div 10) - (7x - 4x \div 1 \div 2)) =$

a) Solve for $x = 1$ _____

b) Solve for $x = 3$ _____

c) Solve for $x = 2$ _____

95) Simplify algebraic expression

$((4x \div 2) + 2) - (2 - 1) + 5 =$

a) Solve for $x = 2$ _____

b) Solve for $x = 1$ _____

c) Solve for $x = 0$ _____

96) Simplify algebraic expression

$(8x \div 1) - (7x - 2x \div (9 - 7)) =$

a) Solve for $x = 1$ _____

b) Solve for $x = 5$ _____

c) Solve for $x = 4$ _____
