

101) Simplify algebraic expression

$$(9x - 7x) + (((8x + 8 - 8x))) \div 1 \div (8 - 4) =$$

- a) Solve for $x = 0$ _____
- b) Solve for $x = 2$ _____
- c) Solve for $x = 1$ _____

102) Simplify algebraic expression

$$(5x \div 1 \times 10) \div 5 \div (20x \div 5 - (4x \div 2)) =$$

- a) Solve for $x = 5$ _____
- b) Solve for $x = 8$ _____
- c) Solve for $x = 3$ _____

103) Simplify algebraic expression

$$((20x \div 10 + 7 + 10) - ((6 + 2x \div 2))) - 9 =$$

- a) Solve for $x = 5$ _____
- b) Solve for $x = 1$ _____
- c) Solve for $x = 4$ _____

104) Simplify algebraic expression

$$(((8x + 4) - 7x - (1 + x))) + 4 + 6 - 5 =$$

- a) Solve for $x = 9$ _____
- b) Solve for $x = 4$ _____
- c) Solve for $x = 7$ _____
