

1) Simplify algebraic expression

$$56x \div 8 - 4x \div 1 \div 4 \times 5 =$$

- a) Solve for $x = 2$ _____
- b) Solve for $x = 5$ _____
- c) Solve for $x = 1$ _____

2) Simplify algebraic expression

$$2x \div 2 + 1 - 10 + 1 \times 3 + 7 =$$

- a) Solve for $x = 5$ _____
- b) Solve for $x = 3$ _____
- c) Solve for $x = 9$ _____

3) Simplify algebraic expression

$$(x + 4x - 4x) \times (9 + 9) \div (9x) =$$

- a) Solve for $x = 8$ _____
- b) Solve for $x = 7$ _____
- c) Solve for $x = 0$ _____

4) Simplify algebraic expression

$$8 + x \times 1 \div ((4 + 3) \div 7) =$$

- a) Solve for $x = 1$ _____
- b) Solve for $x = 0$ _____
- c) Solve for $x = 2$ _____
