

1) Simplify algebraic expression

$$50 \div 10 - 3 - 2 + 16x \div 8 =$$

- a) Solve for $x = 4$ _____
- b) Solve for $x = 2$ _____
- c) Solve for $x = 3$ _____

2) Simplify algebraic expression

$$4x \div 4 + 5 + 6 - 8 - 2 \times 2 + 2 =$$

- a) Solve for $x = 7$ _____
- b) Solve for $x = 8$ _____
- c) Solve for $x = 6$ _____

3) Simplify algebraic expression

$$(80x \div 10) \div ((8x \times 3) \div 3) + 8 =$$

- a) Solve for $x = 8$ _____
- b) Solve for $x = 0$ _____
- c) Solve for $x = 2$ _____

4) Simplify algebraic expression

$$((2 + 2x) \div 1) \div ((3 + 6 - 7)) =$$

- a) Solve for $x = 7$ _____
- b) Solve for $x = 9$ _____
- c) Solve for $x = 8$ _____
