

1) Simplify algebraic expression

$$10x + 2 - 6x \div 3 \times 1 - 4x =$$

- a) Solve for $x = 2$ _____
- b) Solve for $x = 0$ _____
- c) Solve for $x = 1$ _____

2) Simplify algebraic expression

$$4 + 6x \div (24 \div 3 \times 2x \div (6 + 10x \div (5x))) =$$

- a) Solve for $x = 2$ _____
- b) Solve for $x = 1$ _____
- c) Solve for $x = 5$ _____

3) Simplify algebraic expression

$$(5x - 3x + 8x) \div (2x) + 9x \div (9x) =$$

- a) Solve for $x = 10$ _____
- b) Solve for $x = 0$ _____
- c) Solve for $x = 9$ _____

4) Simplify algebraic expression

$$((32x \div 8 + 2) - (12 \div 2) + 5) =$$

- a) Solve for $x = 2$ _____
- b) Solve for $x = 0$ _____
- c) Solve for $x = 1$ _____
